PROFESIONAL PROFILE

Hybrid profile with analytical skills, experience in project management and stakeholder engagement. Possess technical knowledge in OOP, pipelines, databases, and cybersecurity. Looking to take the next step into roles in Data, Data Science, Computer Vision, and Machine Learning. Motivated to continue learning and applying my skills in software development, data pipelines, and predictive modeling to generate impact through data.

ACHIEVEMENTS

- ✓ Analyzed and structured of financial and statistical data.
- ✓ Developed and deployed digital applications to automate manual workflows, significantly reducing human error and operational overhead.
- ✓ Spearheaded performance improvement initiatives that generated measurable cost savings and increased overall project profitability.

PROFESSIONAL EXPERIENCE

(Jan 2025 – Present) Software & Civil Engineer
Freelance, México, México.

- ✓ Designed and deployed of digital applications to automate tasks.
- ✓ Developed of computer vision systems.
- ✓ Optimized of workflows: Automated critical tasks using custom scripts, achieving a 25% reduction in execution and data processing times across projects (Java – Python – SQL).
- ✓ Designed Software architecture under Object-Oriented Programming paradigms and design of relational database schemas for efficient management of large volumes of technical information.
- ✓ Performed advanced data analysis using statistical modeling and Python to create automated counting applications, optimizing decision-making for traffic studies.

(Jan 2020 – May 2022) Data Analyst
Constellation Brands (WORLEY) Nava, Coahuila, México.

- ✓ Developed and automated strategic reports using Python and Excel, optimizing data extraction and ETL processes from SAP S/4 HANA..
- ✓ Engineered data pipelines for cleaning, debugging, and processing operational datasets, integrating Python automation with SQL queries to enhance database performance.
- ✓ Extracted and processed large-scale data volumes from SAP S/4 HANA, facilitating data-driven decision-making and the delivery of comprehensive financial reports.
- ✓ Supported system implementation and continuous improvement, including capacity analysis, forecasting, and data-driven projects.
- ✓ Managed master data and performance analytics within SAP S/4 HANA, leveraging SQL and Python for advanced data manipulation and reporting.
- ✓ Automated the cleaning and consolidation of data extracted from SAP, reducing manual effort and improving information reliability for budgets and project control.
- ✓ Led cost analysis and comprehensive project budget analysis using Excel, Python, and SQL to identify savings opportunities and financial optimization.
- ✓ Updated Work Breakdown Structures (WBS) in SAP S/4 HANA, ensuring accurate budget control through data validation scripts.
- ✓ Analyzed unit prices and procurement data (Purchase Requisitions and Purchase Orders) using Python and SQL, improving budget accuracy and profitability.
- ✓ Efficiently organized assets and streamlined project financial management through database tools and automation.

(Feb 2015 – Jul 2019) Project Engineer

VITRO García, Nuevo León, México.

- ✓ Developed Python scripts to automate complex cost estimations and performed SQL queries on large datasets to analyze project profitability.
- ✓ Implemented rigorous SQL validation constraints and Python-based data cleaning processes to ensure the integrity and quality of technical project documentation.
- ✓ Performed structural analysis and design in compliance with industry standards.
- ✓ Managed the construction of industrial plants and warehouses, overseeing projects from inception through successful delivery.
- ✓ Successfully negotiated with contractors and suppliers to optimize project profitability and cost-efficiency.
- ✓ Guaranteed full adherence to government regulations and building codes throughout the project lifecycle.
- ✓ Prepared and presented weekly progress reports, providing critical insights into ongoing engineering developments.
- ✓ Investment & Feasibility: Developed investment budgets to evaluate the viability of proposed projects, facilitating informed executive decision-making.
- ✓ Supervised construction sites to ensure strict compliance with project specifications and the maintenance of rigorous quality standards.
- ✓ Reviewed and approved contractor estimates, ensuring financial accuracy and transparency.
- ✓ Proficiently prepared cost estimates and Unit Price Analysis (UPA) to support precise project budgeting.
- ✓ Effectively managed project programming and construction controls, consistently meeting all deadlines and objectives.
- ✓ Executed and supervised construction works, prioritizing quality and operational efficiency at all times.
- ✓ Conducted comprehensive building assessments and structural repairs to enhance safety and long-term integrity.
- ✓ Performed structural analysis and design in compliance with industry standards, including API, NTCDF, LRFD, ACI 318, AWS, ASCE, and CFE, with high precision in technical drafting.

EDUCATION

(Apr 2024 - Present) *Software Engineer*

Universidad Ciudadana de Nuevo León (UCNL), México

✓ *Software Engineering Faculty*

(Feb 2019 – Feb 2021) *Master of Business Administrator*

Universidad Tecnológica de Latinoamérica (UTEL), México

✓ *Master of Business Administration*

(Feb 2005 – Dec 2010) *Civil Engineer*

Universidad Autónoma de Nuevo León (UANL), México

✓ *Civil Engineering Faculty*

ERIC DAVID RODRIGUEZ FLORES

has successfully completed the online Specialization

Harnessing LLMs: Strategy, Fine-Tuning & Evaluation

Now that you have completed Harnessing LLMs: Strategy, Fine-Tuning & Evaluation, you stand out with a unique set of skills and knowledge in AI strategy and implementation. This certificate demonstrates your job readiness and can be shared with your professional network. Throughout this program, you've engaged with instructional videos, assessments, and practical exercises, gaining a deep understanding of key aspects of LLM applications, including:

- Proficiency in LLM business strategy and implementation planning
- Skills in model fine-tuning, evaluation, and selection techniques
- Capability in building production-ready applications with Python and HuggingFace
- Effective deployment of responsible AI systems for business value.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal accreditation or any university or entity and does not grant academic credit, grades, or degree equivalency or recognition. Any other disclaimer, regardless of the learning-based career program or certificate.

ERIC DAVID RODRIGUEZ FLORES

has successfully completed the online Specialization

Rust for Data Engineering

Rust for Data Engineering is a hands-on specialization that teaches you how to build production-grade data systems in Rust — from terminal tools and ETL pipelines to serverless functions, SQL, and NoSQL, data stores, and full CI/CD shipping workflows on GCP. You will move from knowing some Rust to confidently shipping a data pipeline that handles real workloads, runs in a container, and survives production. By the end you will have a portfolio of small but production-shaped projects — CLI, ETL, jobs, SQL-backed services, serverless handlers, RAG pipelines, TUI tools, and GCP deployments — and the engineering muscles to extend any of them into a real system at work.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal accreditation or any university or entity and does not grant academic credit, grades, or degree equivalency or recognition. ERIC DAVID RODRIGUEZ FLORES

has successfully completed the online Specialization

Data Engineering, Big Data, and Machine Learning on GCP

This five-course accelerated specialization is designed for data professionals who are responsible for designing, building, analyzing, and optimizing big data solutions. Through a combination of video lectures, quizzes, and hands-on labs, learners carried out serverless data analysis and productionize machine learning models. This specialization is designed to give learners a robust hands-on experience and is primarily lab-focused.

**Exam Prep (NCA-GENL):
 NVIDIA-Certified
 Generative AI LLMs**

Congratulations! By completing Exam Prep (NVIDIA-Certified Generative AI LLMs - Associate Specialization) you have proven your expertise in generative AI LLMs, NLP and AI deployment with NVIDIA technologies. This certificate validates your skills in designing, optimizing, and deploying AI solutions, positioning you as a skilled AI professional ready to drive innovation in machine learning and deep learning.

This certificate attests to the learner's completion of an online program administered and owned by Coursera Inc. (Coursera). It does not constitute formal enrollment at any university or entity and does not itself grant a student credit, grade, or degree. Institutions or organizations that have been granted the right to display this certificate may use it to indicate a student's progress.

ERIC DAVID RODRIGUEZ FLORES

has successfully completed the online Professional Certificate

IBM RAG and Agentic AI

The certificate holder is proficient in building advanced generative AI applications using RAG, agentic, and multimodal AI technologies. They understand the core concepts and real-world applications of generative AI and agent frameworks. They can design effective prompts, implement function calling, and use tools like LangChain to orchestrate complex reasoning workflows. They can build autonomous and collaborative agents that use memory, feedback, and chaining to solve structured and unstructured problems. They are able to integrate APIs, tools, and multi-step reasoning to create flexible self-improving systems. They can design multi-agent architectures using frameworks like CrewAI and LangGraph, enabling distributed decision-making and dynamic context switching.

16 Courses

- Introduction to Data Engineering
- Python for Data Scientists, AI & Neuroscience
- Python Project for Data Engineering
- Introduction to Statistical Reasoning (DS002)
- Introduction to Big Data with Python
- Machine Learning in the Linux Command Line and Shell Scripting
- Relational Database Architecture
- ETL and Data Pipelines with Shell, Python, and Spark
- Data Warehouse Fundamentals
- Big Data with AWS: AWS Cloud Analytics and Big Data Architectures
- Introduction to Hadoop, Hadoop Distributed File System (HDFS), and MapReduce
- Introduction to Big Data with Spark and Tez/Hive
- Machine Learning with Apache Spark
- Data Engineering Capstone Project
- Generative AI: Elevate your Data Engineering Career
- Data Engineering Career Skills and Interview Preparation

May 17, 2026

ERIC DAVID RODRIGUEZ FLORES

Has successfully completed the online Professional Certificate

IBM Data Engineering

In this professional certificate, learners developed essential knowledge and skills to perform the many tasks in an entry-level data engineering role. By completing over a dozen courses in the program, the earner of this Professional Certificate has demonstrated a firm grasp on and practical experience with Fundamentals of Relational Databases, Database Architecture, Design, & Administration, Data Warehousing, Querying databases with SQL and BI Tools, ETL with Python Programming language and Shell Scripts, NoSQL, and Big Data processing using Apache Spark. Learners have applied these skills to complete a Capstone Project involving the design, deployment, and management of a complete data engineering pipeline inspired by a real-world data analytics requirements scenario.

Antoni Campayo
Director, IBM Skills Network

This certificate attests to the recipient's completion of all eligible courses included in this certificate, as determined by the IBM Skills Network. This certificate is not a degree and does not confer any academic or university credit. It is not a degree and does not confer any academic credit. It is not a degree and does not confer any academic credit.

ERIC DAVID RODRIGUEZ FLORES

has successfully completed the online Specialization

Generative AI Engineering with LLMs

Josep Santesteban,
 Ronda Prasad Karwar,
 Faheem Akbar,
 Sina Naeini, Kang
 Wang, Ashwin Jey
 Wijekun, Victor Ruyter

Generative AI LLMs: Architecture and Data Preparation

Gen AI Foundation Models for NLP & Language Understanding

Generative AI Language Modeling with Transformers

Generative AI Engineering with Transformers

Generative AI Advanced Fine Tuning for LLMs

Fundamentals of AI Agents

Generative AI LangChain and LangGraph

Project: Generative AI Using RAG with RAG and LangChain

In this Specialization, learners develop essential knowledge and skills to perform tasks in an AI or LLM Engineer role. The Certificate holder has demonstrated a firm grasp and has practical experience of the various generative AI architectures and LLMs for developing RAG-based systems. They have demonstrated knowledge of documentation, data sources, transformers, attention mechanisms, and prompt engineering. They have gained experience in frameworks and LLMs, such as GPT and BERT. The Certificate holder can use PyTorch and the Hugging Face Transformers library to develop RAG applications such as a question-and-answering system. They can also use document loaders in LangChain to bring in information from various sources and prepare it for processing.

Certificates

Google UX Design

Those who earn the Google UX Design Professional Certificate have completed seven courses, developed by Google, that include hands-on, practice-based assessments and are designed to prepare them for introductory-level roles in UX design. They can complete the design process from beginning to end: empathizing with users, defining their pain points, coming up with ideas for design solutions, creating wireframes and prototypes, and testing designs to get feedback.

Foundations of User Experience (UX) Design

Start the UX Design Process: Empathize, Define, and Ideate

Build Wireframes and Low-Fidelity Prototypes

Conduct UX Research and Test Early Concepts

Create High-Fidelity Designs and Prototypes in Figma

Build Dynamic User Interfaces (UI) for Websites

Design a User Experience for Social Good & Prepare for Jobs

Accelerate Your job Search with AI

The image shows a certificate of completion from the Universidad de Guadalajara (UDG) and the Universidad Virtual y Aprendizaje Digital (UDG Virtual). The certificate is for Eric David Rodriguez Flores, who has completed the course "English for the Semiconductor Industry". The certificate is dated August 10, 2025. The certificate is signed by Dr. Carlos Ivan Moreno Arellano, Director General de Universidad Virtual. The certificate is framed by a blue border with a pattern of white stars and dots. The UDG logo is in the top left corner, and the UDG Virtual logo is in the top right corner. The ASU Arizona State University logo is in the bottom right corner. The text "Pienso y Trabajo" is written in the center. The text "30 años de la Autonomía de la Universidad de Guadalajara y de su organización en Red" is written in the bottom left corner. A QR code is in the bottom left corner.

PyTorch for Deep Learning

Congratulations on completing the PyTorch for Deep Learning Professional Certificate! You've established a strong foundation in PyTorch, progressing from basic to advanced topics. This journey covered the fundamentals of PyTorch and neural networks to advanced architectures and model deployment techniques, using real-world AI systems to tackle computer vision and natural language processing challenges with TorchVision and Hugging Face models. We're thrilled that you chose to learn with us, and excited to see your career in AI grow.

Dear Eric David Rodríguez Flores,

Your application to work in Canada has been approved. A permit authorizing you to work will be issued to you on your arrival to Canada following an examination by an officer of the Canada Border Services Agency, subject to your compliance with the requirements of the *Immigration and Refugee Protection Act* and its Regulations. The officer will ask to see this letter, your passport and may request to see your supporting documents. Do not pack these or other valuable papers in your checked luggage. You can find out more about which documents you will need to bring with you by visiting www.cic.gc.ca/english/work/arriving.asp.
